

Remote Work Policy

Flexible Workplace Framework, Operations & Distributed Workforce Governance

Document Reference: HR-POL-2025-04 Effective Date: January 1, 2025 Approved By: Chief People Officer (CPO)

1. EXECUTIVE SUMMARY & SCOPE

KnowledgeOS Enterprise supports distributed work models that promote employee flexibility, increase productivity, and attract top-tier global talent. This Remote Work Policy outlines the criteria, responsibilities, security requirements, and operational guidelines governing employees who work outside corporate office locations.

This policy applies to all full-time and part-time regular employees across all global jurisdictions of KnowledgeOS Enterprise who operate under hybrid or fully remote arrangements.

2. REMOTE WORK CLASSIFICATIONS & ELIGIBILITY

Remote work is a privilege and operational arrangement, not an automatic employee entitlement. Eligibility is determined based on role requirements, performance history, and operational feasibility.

Workplace Model	Definition & In-Office Presence	Eligibility Criteria
In-Office / On-Site	5 days/week in primary corporate facility.	Roles requiring physical infrastructure, hardware labs, or facility management.
Hybrid Work	2 to 3 designated days/week in office; remainder remote.	Regular employees in good performance standing following 90 days of tenure.
Fully Remote	100% remote from an approved home office location.	Specialized roles approved by Department VP and People Operations based on business need.

3. APPLICATION & APPROVAL PROCESS

Formal approval is required prior to commencing any remote or hybrid work schedule:

- Formal Request:** Employee submits a Remote Work Agreement form via the HR Portal (Workday), detailing the proposed physical work location and schedule.
- Manager Evaluation:** Direct supervisor reviews team coverage, communication impact, and employee self-management capabilities within 5 business days.
- Security & HR Validation:** IT Security verifies location network compliance, while HR confirms legal tax jurisdiction parameters.
- Final Sign-Off:** Department VP issues formal authorization. Approved agreements are subject to annual review or cancellation based on operational requirements.

4. WORKING HOURS, AVAILABILITY & CORE HOURS

Remote employees are expected to maintain the standard 40-hour workweek commitment applicable to their role.

Core Collaboration Hours

All full-time remote employees must be accessible for synchronous meetings and real-time team collaboration during corporate **Core Hours (10:00 AM to 3:00 PM local time zone)**. Flexible scheduling outside core hours must be pre-approved by the direct manager.

5. COMMUNICATION & AVAILABILITY EXPECTATIONS

- **Communication Platforms:** Official company communication must occur exclusively on Slack, Google Workspace, and Zoom. Personal messaging apps (WhatsApp, iMessage) are prohibited for business operations.
- **Responsiveness:** Employees should maintain active Slack status indicators during working hours. Urgent inquiries during core hours should be acknowledged within 30 minutes.
- **Video Meeting Etiquette:** Video cameras should remain enabled during internal team syncs and client calls unless bandwidth constraints dictate otherwise. Professional, distraction-free backgrounds are mandatory.

6. EQUIPMENT USAGE & HOME INTERNET REQUIREMENTS

6.1 Company-Provided Equipment

KnowledgeOS Enterprise provides standard hardware (laptop, monitor, peripheral suite) managed by IT. Company equipment remains enterprise property and must be used strictly for official business purposes.

6.2 Internet Bandwidth Specifications

Remote employees must maintain a high-speed broadband internet connection capable of handling enterprise cloud tools and video calls without interruption:

- **Minimum Download Speed:** 50 Mbps
- **Minimum Upload Speed:** 10 Mbps
- **Connection Type:** Secure Wi-Fi with WPA3/WPA2 encryption or wired Ethernet. Public, unencrypted hotspots are strictly forbidden for work tasks.

7. DATA SECURITY & CONFIDENTIALITY

Remote environments must maintain the exact same rigorous security standards as corporate facilities.

Mandatory Remote Security Safeguards

- **Always-On Corporate VPN:** All network traffic must route through KnowledgeOS GlobalProtect VPN when accessing internal infrastructure or cloud portals.
- **Physical Privacy:** Monitors must be positioned away from windows or family common areas to prevent unauthorized viewing. Privacy filters are required when working in public spaces.

- **No Unattended Devices:** Laptops must be locked (Win+L / Cmd+Ctrl+Q) whenever the employee steps away from their workspace.

8. PRODUCTIVITY EXPECTATIONS & PERFORMANCE MONITORING

Performance evaluation for remote staff is based strictly on measurable outcomes, deliverable quality, project milestones, and key results (OKRs) rather than physical presence or time logged online.

8.1 Performance Tracking

KnowledgeOS Enterprise does not utilize invasive surveillance software or keyloggers. Productivity is monitored through objective metric tracking in project management tools (Jira, GitHub, Linear, Asana) and regular 1-on-1 manager check-ins.

8.2 Performance Reviews

If a remote employee fails to meet delivery targets or loses availability during core hours, the manager may initiate a formal Performance Improvement Plan (PIP) or revoke remote work privileges.

9. HEALTH, SAFETY & ERGONOMICS

Remote employees must maintain a dedicated, safe, and ergonomically sound home office space free from physical hazards.

- **Workstation Stipend:** Employees receive a \$500 one-time setup allowance for ergonomic chairs, standing desks, or secondary monitors upon remote status approval.
- **Workplace Injuries:** Work-related injuries sustained in the home office during designated working hours must be reported immediately to HR and Workers' Compensation teams within 24 hours.

10. POLICY VIOLATIONS & REVOCATION

Failure to adhere to this policy—including unauthorized work from unvetted international locations, severe security breaches, or persistent unavailability—may result in the immediate revocation of remote work privileges and formal disciplinary action up to termination of employment.
